NOTE.

The Statistical Bulletin of New South Wales was published regularly from 1905 to June Quarter, 1943 (No. 269), then publication was suspended until September Quarter, 1948.

The statistics contained in the Bulletin are the latest available at the time of publication. In some cases the figures are preliminary only, and subject to alteration in a later issue.

For complete information regarding New South Wales, reference should be made to the "Official Year Book of New South Wales" or to the "Statistical Register of New South Wales."

A digest of statistical trends as disclosing economic conditions in New South Wales is issued towards the end of each month under the title, "Monthly Summary of Business Statistics."

Particulars of the above publications are shown on the inside front cover of this bulletin.

NOTE.—Tables 8 and 9 are based upon the records of the Commonwealth Meteorologist. The divisions correspond approximately with the statistical divisions shown on the map in frontpiece of the Official Year Book of New South Wales, each division being subdivided into two sectors indicated by the letters N, S, E, or W according as they constitute the northern, southern, eastern or western portion of the division concerned. Normal Rainfall is based on a period ended 1929.

* The amounts of clearings shown are the recorded totals less Treasury Bill transactions only.

† The index represents the ratio of each month's clearings (calculated on a three months' moving average) to the average for the corresponding period in the years 1926 to 1930 (taken as 100 in each month).

The index is adjusted to eliminate the effects of Treasury Bill and other special transactions on behalf of Governments and the effects of bank amalgamations. No adjustment has been made for normal growth or change of price levels.

No. 76.—Stock Exchange Index (Sydney).

The following index of the values of the principal Company shares on Sydney Stock Exchange embraces the ordinary shares of companies (excluding banking companies) whose business is conducted wholly or largely in New South Wales.

The prices of individual shares are unweighted, and each group average is the mean of the average monthly prices per £1 of paid-up capital. The aggregate index is the average of all the shares included in the groups with the addition of 24 miscellaneous shares. There is no base period as the index represents the ratio per cent. of the average prices of ordinary shares to their par values, adjustment being made where capital is written off or bonus shares are issued.

Average for Period.	23 Manufacturing and Distributing Companies.	10 Retail Companies.	8 Public Utility Companies.	5 Pastoral and Finance Companies.	5 Insurance Companies.	Total 75 Companies.	34 Active Shares included in foregoing.

No. 78.—Employment in New South Wales—Wage and Salary Earners in Civil Employment, Governmental and Private.

(1) The estimates shown below are based on the Census of 1933 and subsequent quasi-censuses (e.g., Civilian Register, 1943, and Occupation Survey, 1945), and returns supplied monthly by governmental authorities and since July, 1941, by employers for purposes of Commonwealth Pay-roll Tax. (2) The number of employees recorded on Pay-roll Tax returns relates to those whose names appeared on the last pay-roll of the month irrespective of whether they were actually working at the end of the month. (3) Working proprietors, wage earners in rural industry, female domestics in private households, members of defence forces at home or abroad and Government "relief" workers are not included.

No. 82.—Wholesale Price Index-Numbers: Basic Materials and Foodstuffs.

(Compiled by the Commonwealth Statistician.)

The price quotations have in the main been obtained directly from manufacturers and dealers, and, with a few important exceptions, from **Melbourne** sources. Apart from home-produced building materials, coal and one or two minor commodities, however, the price movements may be taken as representative of fluctuations in wholesale prices of basic materials in most Australian markets. The weighting system adopted is based on average annual consumption during the years 1928-29 to 1934-35 inclusive.
